RESPONSIBLE AI

WHAT WOULD NEED TO CHANGE FOR DATA CENTRES TO BECOME A FORCE FOR GOOD?

1

PRICE EXTERNALITIES

Carbon and water pricing make cleaner operations the cheaper default.

2

FLEXIBLE LOAD

Shift non-urgent computing to times of cheap, clean electricity.

3

GRID STABILISER

Use on-site batteries to give power back and steady the grid when it needs it.

4

EDUCATION, NOT FEAR

Explain the real costs and benefits, and widen participation in the technology.

5

SHARED BENEFITS

Recover waste heat and create visible value for local communities.
